

DNA COMPARISON/PARENTAGE TEST

1. This form must be completed in full by the registered owner of the pony in question.
2. This form is for DNA comparison only. A sample from the pony you have will be compared to the DNA profile held by Weatherbys Scientific. This form is to be used only for identity cases where the microchip cannot be found or if the owner considers the passport given for the pony does not match the pony.
3. When the completed form plus a fee of €44.25 is received you will be sent a DNA sampling kit. Please get your vet to take the sample for testing and confirm if the correct microchip is present or not. A vet must take the sample.
4. Please send this sample to Weatherbys for analysis in the addressed envelope provided.
5. Results will be confirmed to the CPBS within 3 to 4 weeks and they will send you notification of the result.
